Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The attorney requested a phone interview in order to clarify the invention and to show the differences between existing strongly-ionized plasma generators and the one claimed in the current application. The examiner suggested to incorporate additional limitation regarding reducing arc by controlling the magnitude and the rise time of the voltage pulse, in order to differentiate current invention from the previously existing devices. On April 20, 2006 the attorney made correction to the all independent claims which are reflected in examiner's amendment. The changes made in the claims, place the application in the condition for allowance.
